P/N : HY-004(D) Name : Relay Sensor

Image :

Description :

Relay sensor adopts high-quality relay, normally open interface has the maximum load AC 250V/10A and DC 30V/10A. The sensor is a signal input with a trigger voltage of 0.7V or more. The sensor integrates a power indicator to indicate the operating status;

Parameters :

Name : Relay Sensor

Power : +3.0V -5.5V

Signal type : Digital signal

Connector : XH2.54 × 3

Pin : S-Signal , V-Power , G-Ground

Instructions for use: The relay sensor is a normally open sensor with a high level trigger; when the signal pin output is high, the relay is closed.
